Nelson Meadows and Above

Yes I am in possession of outstanding consulting work bill from the referenced property, that took forever.

In turn , I have waited since the below date to be compensated for the complete trainwreck in my back yard.

The replacement of my grass ,landscape, especially my large bushes are gone.I had to begin repairs by myself. I submitted this and other pictures to staff and it was going to be followed up for compensation . They did however come out and add a culvert on the path.

If I'm being billed for engineering from staff, who is paying for the lake that was not engineered and now added to my backyard .

Let me know how to proceed. I thought you had seen this damage .

Please tell accounts payable to credit my bill or explain to me how to file a claim

Thanks / You got my number

Joel
